December 4, 1957

*Rec'd ED
12/5/57*

Dear Sir:

This letter report describes the activity under Task Order No. C from November 1 to December 1, 1957.

The 1/5-scale hydrogen-generator unit was received from the manufacturer on November 12. This experimental unit was given a visual inspection and is being checked for gas and water leaks. Following this inspection, a series of 1/10 and 1/5-scale hydrogen-generation tests will be made to study the operation of the experimental generator unit. A dry-test meter will be used to measure the volume of gas generated in each of these tests.

The original appropriation on this Task Order was \$18,285. As of November 1, 1957, the unexpended balance was approximately \$15,750.

W.S.

Sincerely,

25X1
